LIVING
IN
STYLE

OUR VISION

“ **Welcome to a world of softness.** Real wood flooring is timeless and irreplaceable. Experience Authentic flooring and discover the deep warmth and the irreplaceable aesthetics offered by this floor which becomes increasingly beautiful year after year. **Wood floors** bring added value to all homes, from the most contemporary to the most romantic. At BerryAlloc, wood floors stand for comfort as well as sensuality, for beauty as well as sustainability. With the respect of environment written in our DNA, we spare no expenses as far as the quality or the origin of wood are concerned. Our involvement in **sustainable development** is total. An argument which touches everyone today. Just like the irreproachable **made in France quality**. This choice explains the elegance of our products: materials, aspects, shades, formats of the **unique planks**, with infinite variations. Treat yourself to the home of your dreams, where space is enhanced by natural wood floors. ”

“LIBERTY,
AUTHENTICITY,
CREATIVITY”

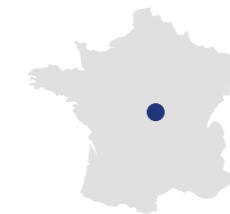

FLOORS TO LAST A LIFETIME

MADE IN FRANCE

There is a reason for BerryAlloc wood floors to be guaranteed 30 years. They are **made to last**, to a **very high standard** in the heart of the Tronçais forest, in Auvergne. This responsible manufacturing made in the **respect of environment**, takes into account local economy while focusing on the quality of a Made in France expertise. An internationally recognized quality which symbolizes work well done, **expertise and love of wood**, passed down from generation to generation. The BerryAlloc wood floors fit both into this tradition and into fashion. On the one hand, there is the very rigorous selection of raw materials. On the other, **a revolutionary installation system**, the Best Loc Xtreme, without hammer or glue, which enables a secure lock. The BerryAlloc wood floors benefit from the PEFC™ certification, **A+ certification** and the Parquets de France label. This is more than a sign of recognition. It provides the guarantee of sustainably managed forests, limited transportation and implies the respect of the health of the consumers we are. It is a guarantee of security and quality for a citizen option.

BERRY≡ALLOC®

OUR WOOD COMES FROM SUSTAINABLY MANAGED FORESTS

CHOOSING NATURE

BerryAlloc has always focused on sustainable development. With wood floors, the choice of a natural material seems obvious. Wood reinvents the floors, improves them, while providing heat and comfort in the home. The wood selected by BerryAlloc for its wood floors is solid. However, it also answers the requirements of a company concerned by environment. A concern for the wellbeing of the planet and of yours.

ORIGINAL WOOD FLOORS

By choosing BerryAlloc wood floors, the amateurs of nature are fulfilled, just as aesthetes are or those who favor solidity for their floor. Each request can be fulfilled. Added to this is the guarantee of a personalized wood floor thanks to unique planks. With BerryAlloc, the word sustainable is also applied to the lifetime of your wood floor, as it is made to last. Quality wood has more than one life, used it just needs to be sanded to see its beauty revealed once more. It is the secret of a cosy home that always looks impeccable.

FORESTS ARE RESPECTED

Choosing a BerryAlloc parquet, is also making a responsible choice, for a company that cares about its product, and is as attentive to the environment as to your lifestyle. For BerryAlloc, species selection is crucial: the woods come exclusively from sustainably managed forests. This management involves traceability and rigorous monitoring at every stage of production and marketing (PEFC™ and FSC® certification for BerryWood).

Berry Wood is
PEFC™ and FSC®
CERTIFIED

PEFC™: Promote
sustainable forest
management.

FSC®: Forest
Stewardship
Council A.C.

*Discover the absolute comfort of
a temperature which is always perfect*

The perfect wood floor for

UNDERFLOOR HEATING

Have you considered floor heating? The structure of our wood floors is composed of a central core in HDF (High Density Fiberboard). This high density associated to its weight creates an exceptional thermal conduction. Nothing is better adapted to guarantee full efficiency for floor heating. A real difference.

Did you know that it was a piece of cake to lay parquet on a floor heating system? There are two possibilities with BerryAlloc wood floors. The most performant in terms of energy saving is full gluing. The wood floor is directly glued to its support. This process facilitates thermal conduction. As a consequence, the distribution of heat is homogeneous, without isolating air level. It is the ideal way to lay these wood floors. Our wood floors also enable to choose a floating floor installation. In this case, the underlay is the key to success, that is why we advise to use the Excellence+ underlay which is totally adapted.

All our wood floors are compatible with floor heating.

Consult our instructions on the fitting conditions on berryalloc.com (depending on the floorheating system)

BERRY≡ALLOC®

WOOD FLOORS MADE TO LAST

DESIGNED TO LAST

The structure of BerryAlloc wood floors is made to resist. An HDF (High Density Fiberboard) core guarantees excellent stability, a high level of resistance to impact, a true efficiency for floor heating, perfect joints (thanks to very precise manufacturing). The noble wood cover will age well.

GUARANTEES*

The BerryAlloc wood floors are guaranteed up to 30 years for a normal and residential use. The wood floors with a 3,3 or 3,5 mm wood thickness are guaranteed 30 years (Saga, Royal XL, Noble, Emotions, Cosmo, Lodge & Ecoforest); the wood floors with a 2,5mm wood thickness are guaranteed 15 years (Palace, Majestic & Ambition).

TIME
GUARANTEE

CONCERNING ESTHETICS

With the full-glue option, laying your wood floors (made easier by our BestlocX-Treme system) does not need expansion joints. We recommend it for wide spaces above 8m as the result is homogeneous. Otherwise, you should use T-mouldings, which are color coordinated to your wood floors.

Consult our instructions on the fitting conditions on berryalloc.com

* Please read our guarantee conditions.

CAN YOU HEAR ANYTHING?

Calm and quiet when you get home is the least. Whether you choose a floating or full glue installation, this legit wish is made true. For the first, the essential Excellente + underlay substantially lowers decibels (-19 dB with a 14mm wood floor). Whereas full glue helps obtain the best acoustic results in a room.

« *No need to wax or scrape
your wood floors with steel wool.
Or make them too dull or too shiny.
A modern parquet floor needs no
preparation and will stay looking
beautiful for years to come.* »

VARNISHED OR OILED WOOD FLOORS

SIMPLE AND EASY TO MAINTAIN

Prepared in a factory to make your life easier; varnished or oiled wood floors are easily cared for today. The only thing to do is to decide which one to choose, as it is a question of taste and desire.

VARNISHED WOOD FLOORS, THE EFFICIENCY.

With children at home, it is the guarantee you will not have to spend hours cleaning. Varnished, or lacquered, the wood floor is covered with an invisible layer of waterproof protection film which protects the wood, avoids use and dirt. Glossy or mat, it is your choice. And to maintain the beauty of your floors, we recommend you to take care of them with appropriate products.

OILED WOOD FLOORS, THE SUBTLETY.

The ones who like nature choose this version that requires a little more care. Covered in a product made with oil and specific components saturating its pores, the wood is protected. It is a subtle finish requiring more care. When it loses its shine, it just needs to be revived with an adapted oil. An operation which needs to be carried out once a year in general in each room (adapted to the traffic).

OUR ADVICE

To keep the beauty of your floor as long as possible, think of felt pads under the legs of your furniture. Do not forget to have a doormat at the entrance. Two efficient means to avoid scratches. And consult our maintenance records to know the products adapted to your wood floor.

WOOD FLOORS

*NATURAL
& AUTHENTIC*

RESISTANT TO ALL THE TESTS OF LIFE

Our floors are so resistant that they have a 15 to 30 years guarantee on all house applications! The structure of the BerryAlloc wood floors with an HDF core guarantee perfect stability, perfect joints and a great efficiency for floor heating.

AUTHENTIC AND CREATIVE

10 collections, 5 aspects, 4 choices of wood, 95 references in different formats, we have put all our creativity to the service of the most beautiful wood species for an optimum personalization of your home.

SIMPLE TO INSTALL AND SUSTAINABLE

The Best LOC® and Best LOC X-Treme fixation systems for an easy assembly with no tools or glue and the joints have a strong resistance over time (with a lifetime guarantee).

RESPECTFUL OF THE ENVIRONMENT

The PEFC™ certification on BerryAlloc wooden floors endorses our respect for nature.

 Classe 34 Very heavy commercial Airports, department stores, counter halls...

SINGLE PLANK WOOD FLOOR

BERRY≡ALLOC®

3 STRIPS WOOD FLOOR

SURFACE FINISHES

LACQUERED PARQUET

Our different lacquers, which have a high content of aluminium oxide insure the parquet an extreme wear resistance and a easy maintenance.

SOFT TOUCH®:

A new generation varnish that provides a very silky touch sensation and exceptional surface finish. You can find the matt varnish look in the Emotions range.

ULTIMTEC®: Ultimtec® varnish establishes new standards for durability and strength. Thanks to its conclusive formulation of molecular nano-technology, wear and scratch resistance (over 15,000 rpm Taber) has improved dramatically. Available in 3 finishes: satin, patina or matt can be found in the Ecoforest, Royal XL, Cosmo & Noble ranges.

MASTERRESIST®

Applied in 6 coats, this varnish provides a thick enough layer to ensure the protection and easy maintenance of your floor. It offers a beautiful satin, patina or matt look that you can find in the Palace, Ambition and Majestic ranges.

OILED PARQUET

OILED FINISH

The parquet is impregnated with a top quality oil to nourish the material and reinforce the protection. Can be found in the Ambition, Royal XL, Palace, Noble, Saga and Ecoforest ranges.

NATURAL OIL FINISH

The parquet is impregnated with high quality natural oil based on linseed oil for an authentic and natural appearance. See this in the Lodge, Noble, Ambition and Ecoforest ranges.

DECORATIVE FINISHES

RUSTIC CRACKS

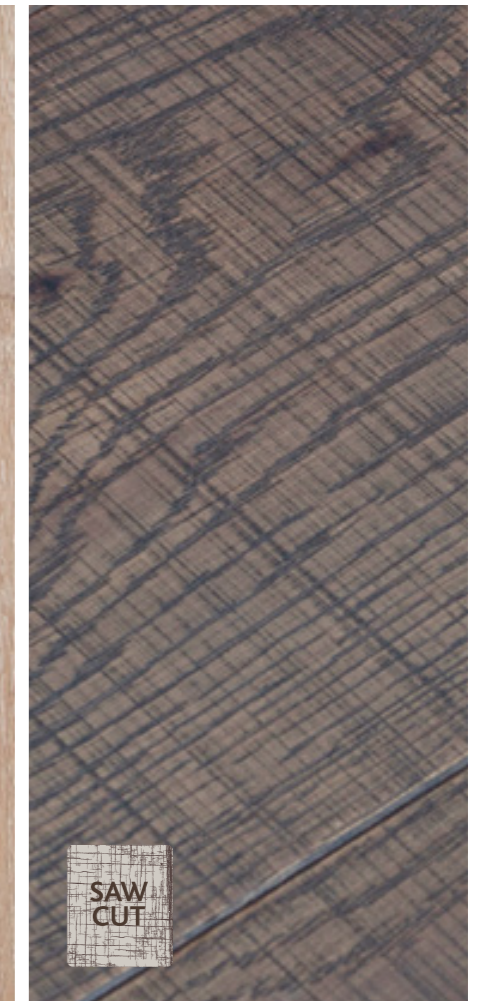

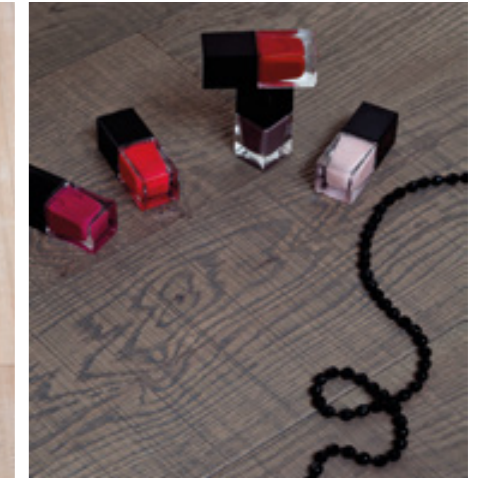

Made using traditional know-how, this finish with deep brushing and grooves gives the pronounced character of an old parquet floor.

AGED

Looks like an original wooden floor renovated by hand. To get this authentic effect, the Natural color of the oak is aged and the surface is manually handscraped.

SAWCUT

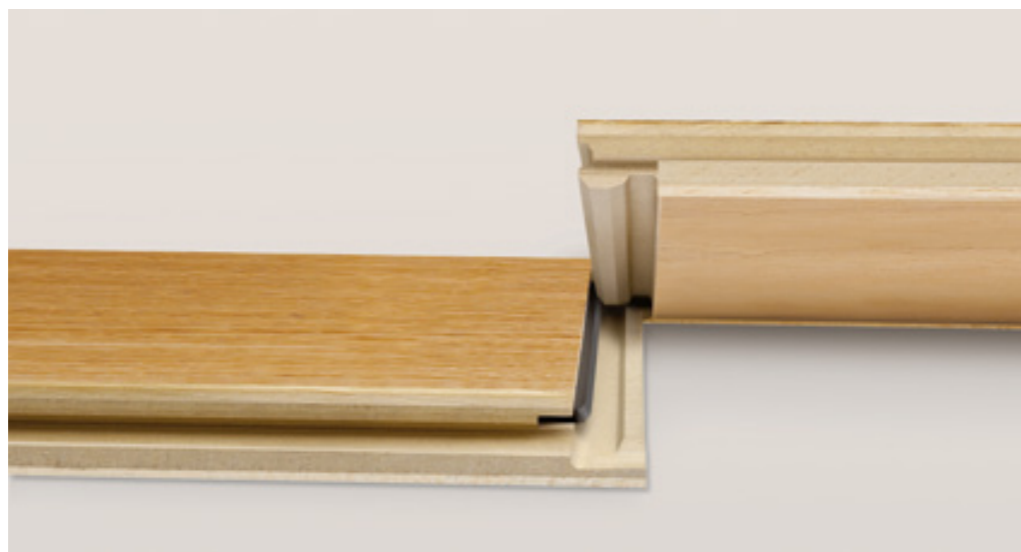

For a unique finish, the wood surface displays a sawdust pattern. This structured effect provides a subtle finish to the board.

NO NEED FOR **TOOLS OR GLUE**

**BEST
LOC®
X-TREME**

BEST LOC® X-TREME

Installation is even easier, simpler and faster (up to 30% faster compared to Best Loc®). The planks are installed one after another, by simply folding them into place. No tools or glue needed.

**BEST
LOC®**

BEST LOC®

> Angle-angle installation method

The quality of its profile and the angular locking (length/width) makes it easy to lay without tools, glue or mallet.

**LOC
LIFE
TIME
GUARANTEE**

OUR INSTALLATION SYSTEMS ARE REMARKABLY **STRONG**, AND SO **DURABLE** THAT BEST LOC® AND BEST LOC® X-TREME COME WITH A **LIFETIME GUARANTEE**.

TRADITIONAL INSTALLATION

TONGUE & GROOVE

> Traditional glued tongue and groove installation.

The boards are made with a part called the « groove » and a part called the « tongue » which is held together with a vinyl adhesive.

INSTALLATION **BASIC RULES**

- Before laying, let the planks lie flat (closed packs) in the room for 24 to 48 hours.
- Make sure the supporting surface is clean, even, firm and dry.
- Mix the planks from several packs in one production batch, so that the overall appearance of the floor is balanced.
- Our parquets may be laid on a floating or glued-down base.
- Our parquet is suitable for laying over a low-temperature, heated floor (max 28°C). "Glued-down" laying ensures that the under-floor heating is effected.
- For the fitting over cooled floors, please contact our technical service for advice.
- Do not lay BerryAlloc parquet in damp rooms! Water is the N°1 enemy of wood.
- Please read the installation instructions carefully before starting to lay your wood floor.

MAINTENANCE OF PARQUET

- You just need to sweep or vacuum, dust or wipe with a cloth. But, be careful! If you are using a floor cloth, make sure it's not too wet: water and wood do not get along...
- If your BerryAlloc parquet should start to show signs of fatigue and lose its vividness, simply rejuvenate it! Clean it very carefully and then apply a grease-remover. Finally, apply a renovating coat. This will restore its splendour, enhanced by the patina of the years.
- Scratches can be easily repaired by applying wax sticks matching to the colour of the wood.

FOR LACQUERED PARQUET, WE RECOMMEND

GREASE REMOVER

BLANCHON super-active cleaner
Remover BONA
Parquet Cleaner OVERMAT

RENOVATING COAT

BLANCHON renovator
D 509 BONA
Polish Remover OVERMAT

FOR OILED PARQUET

NATURAL SOAP BY BERRYALLOC (supplied in 1 L bottles)

BerryAlloc 100% vegetable natural soap is used for regular deep cleaning of oiled parquet. Powerful, it preserves the natural appearance and beauty of the parquet and is improving its protection.

MAINTENANCE OIL BY BERRYALLOC (supplied in 1L bottles)

Oil and wax-based BerryAlloc maintenance oil protects the parquet and preserves the natural, warm appearance of the oak. Gives protection and patina to the parquet. Oil ready for use.

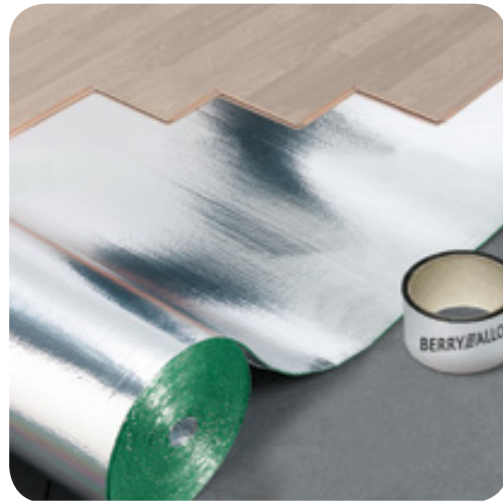

COLOURED OILS BY BERRYALLOC (supplied as 250ml / option hardener 50 ml)

BerryAlloc coloured oils are used to repair oiled parquets easily and effectively. There are a number of shades to match the colours of our collection of oiled parquets. They may be mixed with our hardener for faster drying. They may also be used for full renovation, or may be applied to bare parquet boards. (see instructions for use).

UNDERLAY OR GLUE

THE INDISPENSABLE ACCESSORY FOR YOUR WOOD FLOOR

Especially to provide the optimum sound-proofing for the room itself and the rooms below.

EXCELLENCE+ UNDERLAY

Extra heavy for extra sound insulation*

- Includes an adhesive strip
- Great noise insulation (-19 dB), both in the room and in rooms below
- Available in 10m² rolls (as per DTU511 standard)

Code: SEPLUS10

BERRYALLOK ADHESIVE

For full bonding of your parquet:

- Ideal floor heating
- Reduces footstep noise
- No water, no solvent, fast setting, elastic hardening
- CTBA NF B 54008 certification
- Consumption: 750-1000g/m² depending on the fixture
- Available in boxes of 3 packs of 6kg (18kg) with dispenser

Code : 9310-0024

SKIRTINGS

WHITE SKIRTINGS TO BE PAINTED IN THE COLOUR OF THE WALL OR WOOD VENEER MATCHING THE COLOUR OF YOUR WOOD FLOOR

WHITE SKIRTING 100 MM
2400 x 14 x 100 mm (L x W x H)
Code : 9372-3045 (4pc/pack)

MODERN SKIRTING 80 MM
A simple design, for a contemporary decorative touch. 2400 x 14 x 80 mm (L x W x H)

BEADING
The essential fitting to link an existing skirting to a new floor, and also to hide the expansion joint. 2400 x 14 x 14 mm (L x W x H)

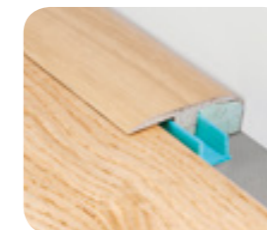

PROFILES & CONNECTIONS

3 in 1 Profile! Our 3-in-1 profile is the ideal solution for transition between two types of floor covering, to hide a difference in height or an expansion joint. Supplied with a cutting tool and fixing bar.

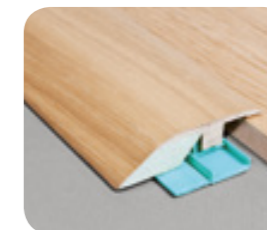

930mm long x 45mm (min.) or 68mm (max.) wide
2150mm long x 45mm (min.) or 68mm (max.) wide

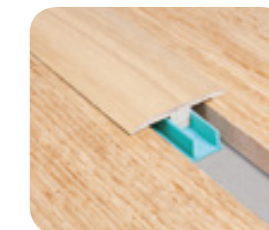

SUPPLIED WITH CUTTING TOOL AND FIXING BAR

END-PROFILE
For a perfect finish around the edge of your floor, or to ensure the transition with a sliding frame, a door threshold, etc.

REDUCER
A reducer provides a perfect link between your new wood floor and a lower floor (tiling, carpet, etc.).

T-PROFILE
Provide a perfect transition between two planks, and hide the expansion joint.

BerryAlloc has the right flooring for all domestic and public spaces. In addition to natural wood floors, BerryAlloc also offers a complete range of laminates and vinyl flooring, and a wide choice of wall coverings. Discover the full BerryAlloc range at:

www.berryalloc.com

Non-contractual document. Printing techniques may cause small variations in the colours shown. BerryAlloc reserves the right to modify its range without notice. Printing 03/18. Limited stocks available.

BERRY  ALLOC®

LONG LIVE WOOD FLOORS MADE IN FRANCE

“Liberty, Authenticity, Creativity”

Made in the mythical Tronçais forest, our wood floors do not give up on anything. Choice, easy access, simple installation, environmental involvement. Wood floors which definitely make life more pleasant.
